ELECTRICAL DATA:

THIS PRODUCT IS AN ELECTROMAGNETIC HOLDING DEVICE, INTENDED FOR USE IN FIRE DOOR APPLICATIONS, BUT CAN BE USED FOR OTHER MAGNETIC APPLICATIONS. WIRE INTO PROPER TERMINALS AS NOTED BELOW:

2300T SERIES SPECIFICATIONS	
VOLTAGE:	12 DC
DC/ma	60
DC/VA	.72
TERMINALS	Com & 12 v

TIMER RELAY SPECIFICATIONS	
VOLTAGE RANGE:	5v-20v
MAX CURRENT:	5amp or 10amp
*FACTORY PRESET TIME DURATION:	3 minutes
TIMER CURRENT CONSUMPTION:	0.004amp

*TIMER IS PRESET TO HOLD DOORS OPEN FOR 3 MINUTES FROM THE TIME OF ACTIVATION. ACTIVATION IS ACHIEVED WHEN THE DOOR IS OPENED ALLOWING THE DOOR ARMATURE PLATE TO CONTACT THE WALL MAGNET, PUSHING THE ACTIVATION SWITCH. DOOR WILL AUTOMATICALLY RELEASE AFTER THE SET TIME PERIOD.

WIRING FOR 12 VDC WITH INTERNAL TIMER RELAY

SCREW DETAIL		
	QTY	SCREW
MAGNETIC WALL PORTION	2	6-32 x 1" OVAL HEAD MACHINE SCREW
MAGNETIC COVER	2	6-32 x 1" FLAT HEAD MACHINE SCREW
DOOR ARMATURE	2	10-32 x 1" PAN HEAD MACHINE SCREW
		10-32 x 1-1/4" SNB

2300T ELECTROMAGNETIC DOOR HOLDER WITH INTERNAL TIMER,

SURFACE WALL MOUNT

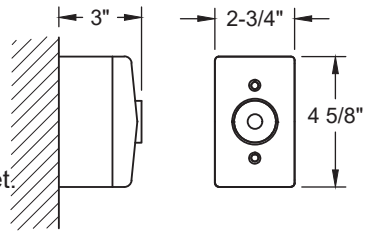

WALL PORTION INSTALLATION:

1. Measure distance from pivot centerline to wall (Dim. "A").
2. Determine door width (Dim. "B").
3. Use table below to locate magnet box on wall (Dim. "C").
   a. Example : Dim. "A" = 10" Dim. "B" = 42" Result Dim. "C" = 39".
   b. If Dim. "A" or Dim. "B" Falls between dimensions listed in the table below, allow for difference. magnet box.
   Example : Dim. "A"= 7" Dim. "B" = 36" Estimated Dim "C" = 33-7/16"
   c. If Dim. "A" and Dim. "B" intersect in the shaded area, **DO NOT INSTALL**
   The degree of door opening will not allow for proper alignment between armature and wall magnet.
4. Suggested vertical location is on top rail approximately 5" from top of the door.
5. Check degree of door opening shown in table and coordinate with door closer and other door hardware.
6. Total projection of door hardware must not be more than 5-5/8" on the pull side of door. If greater, you will need to use additional extensions, sold separately.

Dim. "A"	DIM. "B" (DOOR WIDTH)																					
	28		30		32		34		36		38		40		42		44		46		48

26															33-1/8	123°	35-3/8	121°	37-3/4	120°	40	118°

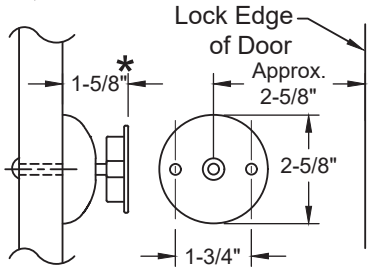

7. From corner of wall, measure the appropriate Dim. "C" determined in step 3.
8. Proper electrical wire routing must be done before installing electrical box.
9. The electrical box should be installed with reinforcement to withstand a minimum 50 lb. pull.
10. Before installing magnetic wall portion, consult " ELECTRICAL DATA" on page 1.

IMPORTANT : Check that power voltage equals one of the voltages labeled on back of magnet.

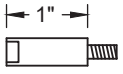

DOOR ARMATURE INSTALLATION:

1. Place and center the door armature on the surface of the magnet with the two holes of the base aligned horizontally.
2. Gently close the door and adjust the angle of the door armature so the base lays flat against the door.
3. While keeping slight pressure on the door, mark location of door armature through the two base holes.
4. Drill through the door where the two marks are located with 5/16" drill. Fasten armature with the (2)10-32 machine screws & sex bolts provided.

NOTE: 1. All dimensions are provided in inches, unless noted otherwise.
2. Additional extensions can be ordered separately to increase the door armature projection : 3/8", 1/2", 3/4", 1", 2", 4" or 6".

* For 2-5/8" Door Projection, use 1" Extension provided complimentary
