PROTECTION PLATES CUSTOM ORDERING INFORMATION

(For Protection Plate 'Options' or 'Fasteners' pricing see page 107)

Get your custom price in 3 quick steps. (With a little help from a calculator)

1. **Find your 'Size Factor' (Max 48" x 48")**
   Multiply your desired '**Height**' and '**Width**' (**HxW**) then divide it by 100.

$$\frac{H \times W}{100} = \text{Size Factor}$$

2. **Find your 'Material Rate'**
   Locate your desired '**Plate Height**' & '**Material Finish**' in the table below to get your '**Material Rate**'.

3. **Multiply to get your 'Base List Price'**

$$\text{Size Factor} \times \text{Material Rate} = \text{Base LIst Price}$$

Example 1:

For a custom 12.75" × 38" plate,
the '**Size Factor**' is 484.5 (12.75 × 38) divided by 100 (4.845)
then rounded up $4.85 (price per hundred square inch).

If the '**Material Rate**' for a 12.75" high plate is $15.50, your
'**Base List Price**' = **$75.18** (4.85 × $15.50).

Example 2:

For a custom 10.5" × 33.75" plate,
the '**Size Factor**' is 354.375 (10.5 × 33.75) divided by 100 (3.54375)
then rounded up 3.55.

If the '**Material Rate**' for a 10.5" high plate is $18.10, your
'**Base List Price**' = **$64.26** (3.55 × $18.10).
